

omics.data.edu.au

How to find data and send to your own computational environment

STEP	Task
1	Go to http://omics.data.edu.au/use/
2	Launch the platform and log in
4	Add the “ABPRI-Data” app to the toolbar.
5	Open the “ABPRI-Data” app.
6	Log-into the “ABPRI-Data” app using the username and password given to you (you will need to enter omics as the domain).
7	A simple search interface is shown or load the Advanced interface (which has many more search criteria), and locate some data that of interest to you.
9	Send the files to your own computational environment. You may need more information at hand to use SCP, SFTP or FTP options

If you need further assistance, please contact us at omicsdataservices@lists.unimelb.edu.au
